ADMISSION POLICY

JobTrain vocational training programs are open to students regardless of their eligibility for funding. Students must be 18 or over upon completion of vocational training. Some programs are open to non-high school graduates.

- JobTrain counselors enroll students in classes based on professional assessment of the students' ability to benefit from training, considering a broad range of factors including students' academic skills, employability, availability, completion of prerequisite activities or classes, attitudes, and previous training and employment history.
- In case enrollments are limited by class size, priority may be given to students based on availability of funding, education, aptitude, and other factors. Since some funding sources impose particular requirements regarding residence, barriers to employment, Selective Service registration, income, gender, etc., those may be factors considered in prioritization of enrollments. Assessment process may take a minimum of 2-3 weeks.

Non-vocational training classes such as: English as a Second Language, Success Through Academics and Training (STAT), GED, and Computer Literacy are open to members of the community based on their needs consistent with JobTrain's Mission which is to serve those most in need.
